

No Green Thumb Required!

Everyone wants their family to eat healthy food and a back yard garden is the way to go. But with today's big houses and tiny yards, often there is no room for a traditionally sized garden. Most families are too busy to take on a project that requires hours of weeding every week nor do they have the time to research planting dates and plant varieties.

"No Green Thumb Required" is a new approach to home gardening that combines ancient methods of intensive gardening with the latest research in soil science, natural fertilizers, and organic gardening techniques.

Best of all, it's easy! By building raised beds and filling them with weedless soil, you eliminate the hassle. All you do is plant seeds and water as needed. This book will take you through the steps of how you and your family can plan, install and manage your own organic garden, and save money on vegetables at the supermarket, too!

Start a new tradition in your family, help your kids learn about nature, and start eating, safe, fresh, healthy vegetables, all year long!

No Green Thumb Required!

Organic Family
Gardening Made Easy

Don Rosenberg

CONTENTS

Introduction	9
1. The Quest for Healthy Food	11
Toxins in Foods	11
Synthetic Fertilizers	13
Contaminated Foods	13
Childhood Obesity	15
Vegetable Nutrition and Freshness	16
Soil Fertility and Nutrient Content	17
Food Prices	19
Fossil Fuels Used in Food Production	20
2. Traditional Gardening Woes	21
Family Issues	21
Limited Garden Space	21
Weeds, weeds, weeds!	21
Contaminated Soils	22
Water Restrictions	23
3. Your Back Yard Garden Solution	25
Gardening History	26
Going Organic	27
4. Efficient Gardening Approaches	29
Intensive Planting	29
Succession Planting	29
Companion Planting	29
Inter-planting	30
No Till Gardening	30
5. Getting Started	31
Sunlight	31
Garden Size	31
Slopes and Hills	32
Location, Location, Location	32
Raised Beds and Trellis Beds	32
Growing Vertically	32
The Benefits of Vertical Gardening	33
6. Which Crops to Grow? Think “FRESNO”	35

7. Gardening with Your Kids	37
Planting with Your Kids	38
Easiest is Not Always Best	38
It's OK to Fail - Nothing is Perfect	39
The Value of Patience	39
Math in the Garden	40
Science in the Garden	40
Creating Memories	40
8. Organic vs. Heirloom Seeds	41
Heirloom Seeds	42
